

# NOW THAT COVID IS ALL OVER

by Graham Langley November 2021

Tune: What a Friend we Have in Jesus

Now that Covid is all over  
What a happy time for me  
Getting back to life as usual  
Returning to normality  
Cars all jammed up in the High Street  
Buses chugging nose to tail  
Children walking on the pavement  
Can breathe but best not to inhale

Bankers busy doing business  
Building our prosperity  
See them piling up the profits  
But not for the likes of you and me  
The super-rich have come out smiling  
From their Caribbean shores  
Knowing business goes as usual  
So they can just ignore the poor

Fracking oil across the landscape  
Cutting forests till they're flat  
Poison all the seas and rivers  
What's the prob-el-em with that  
Now I'm free to go out shopping  
Strolling gently down the street  
Once more there's homeless in the doorways  
Begging for a bite to eat

For those who control the media  
Lies and truth are all the same  
"British workers they are lazy  
Immigrants the ones to blame"  
Let us bomb a few more countries  
So we can set the people free  
Making money out of misery  
While we give them "democracy"

Is this the normal we are needing?  
Is this the sort of world we want?  
Time for us to make some changes  
Turn the system back to front  
Now that Covid is all over  
Let's forget normality  
Time for us to make some changes  
And build a world that's fair and free
